Education

BS Computer Science **FAST-NUCES** *September 2022 -June 2026*

CGPA [**3.1**]

Professional Summary

Computer Science graduate, Web Developer, and AI enthusiast with strong expertise in backend development, AI-powered systems, and automation. Experienced in building real-world, production-oriented applications using Flask, FastAPI, React, MongoDB, and intelligent agents with LangChain and n8n. Final Year Project focuses on an AI-driven healthcare platform integrating voice AI, NLP, telephony APIs, and secure system design. Passionate educator known for simplifying complex technical concepts and building strong programming fundamentals.

Related Courses

Programming Fundamentals (C, C++, Python, JavaScript)

Object Oriented Programming

Data Structures & Algorithms

Database Systems

Operating Systems

Web Development

Software Engineering

Artificial Intelligence

Compiler Construction

Information Security

Natural Language Processing

Deep Learning for Perception

Final Year Project

MediCall AI – AI Powered Healthcare Platform

- **Problem:** Delays, poor prioritization, and lack of integrated online healthcare services.
- **Solution:** Built a credit-based AI system to automate symptom analysis, consultations, and medicine delivery.
- **Tech:** React, Tailwind, Flask/FastAPI, MongoDB, Twilio, Whisper AI, LangChain, WebRTC

Skills

- **Web & Backend Development:** HTML, CSS, JavaScript, React.js | Flask, FastAPI, Node.js, Express.js | REST APIs, MVC Architecture
- **Databases:** MongoDB, SQL, SQLite
- **Programming Languages:** Python, JavaScript, C, C++, Assembly
- **AI & Automation:** NLP (RNN, LSTM, BiLSTM, Transformers, Attention) | LangChain, n8n Automation | AI Agents & Workflow Automation
- **Tools:** VS Code, Git, Postman, Vercel

Professional Experience

Software Development Intern – MERN Stack

- Developed a job-matching platform with secure authentication and role-based access.
- Implemented skill-based job filtering, job posting, and management modules.
- Built responsive UI using React and Tailwind CSS with dynamic routing.
- Designed RESTful APIs using Node.js and Express following MVC architecture.
- Secured backend using JWT authentication and bcrypt encryption.
- Used MongoDB with Mongoose for data modeling and persistence.
- Deployed frontend on Vercel and tested APIs using Postman.

Paid Project

Industry Automation Agents (n8n)

- Built intelligent automation agents using **n8n** for real-world workflow automation.
- Automated scheduling, notifications, and data handling tasks.
- Designed reusable automation pipelines for scalable deployment.

Backend Web Application (Flask)

- Developed a production-level backend using **Flask**.
- Implemented REST APIs, authentication, and database integration.
- Delivered a client-ready, secure backend system.

Academic & Personal Projects

- **Dodge-EM Game (C++)**: Object-oriented game with levels and scoring.
- **Hostel Management System (C++)**: Room allocation and student record management using OOP.
- **Dictionary Application**: Fast lookup using hash tables.
- **Airline Management System**: Flight scheduling and booking using database principles.

Certifications

- Internship Certificate *by **Uworx.co.uk***
- **Flask Development Certificate**, issued by Udemy
- **TEDx Security Certificate**, issued by FAST-NUCES.
- DAIRA Management Certificate

Teaching & Knowledge Areas

- Programming Fundamentals **(Python, C++, JavaScript)**
- Web & Backend Development
- Information Security & Cryptography **(Classical + Modern)**
- Artificial Intelligence & NLP
- AI Automation & Intelligent Agents

Extra-Curricular Activities

ICIT, Daira Management
